

Sealing Cytotoxic Containers for Disposal

- It is the responsibility of unit staff to close and seal **Cytotoxic** waste containers prior to disposal.
- Ensure that the contents are fully contained within the container.

IMPORTANT

DO NOT REMOVE THE WHITE PLASTIC SEAL AROUND THE RIM

- Place the white gasket lid on top of the container and seal using a **MALLET** or **HAMMER**.
- Hit around the entire edge of the lid until it is securely sealed.
- Once sealed place the **Cytotoxic** container in the soiled utility room or soiled holding area for collection by EVS. (Housekeeping)

An approved red container must be used and must contain the universal Cytotoxic “C” marking.

***no liner is required however if a red liner was used for spill or smell prevention measures it must be fully contained within the container prior to sealing.**
